The Boscostone porcelain tile collection blends the beauty of Italian Fior di Bosco and Spanish Emperador marbles on a matt surface of stone texture.

These two marbles, which have been associated with design and quality throughout the ages, are re-interpreted on a natural stone texture to form a bridge between classical Hellenistic style and contemporary modern designs.

VERSAILLES HERMITAGE

The VERSAILLES · HERMITAGE collection recreates the marble of centre and Eastern European palaces of the 18th century, where marble acquires all the architectural prominence. A material associated with luxury and sophistication but with a different touch.

Elegant, luxurious and provocative, but above all timeless. Marble is a material that resists all trends, without ever losing its majesty.

MINIWORX

New range of Geometric shaped tiles that come in a variety of surface textures with a muted monochrome colour scheme are the premise of the collection. The complementary elements work together to create a stylish and impactful effect. The tiles come in choice of matt or gloss finishes, with two surface textures, 'Metro' which is smooth or 'Bumpy' which as the name suggests is raised. Miniworx is a clever tile collection that brings together basic shapes and colours, which can be combined in many ways to create an impactful and stylish tiled space.
