

NORDMENDE

SMART LIVING

2022 COLLECTION

There's a name for smart living

We make living as enjoyable and simple as you want.

For over seven decades, NordMende has been helping customers to live the smart life with technologies that are truly ground-breaking and testimony to our commitment, quality and excellence.

Combining great technology with our German engineering heritage, NordMende always looks to deliver the levels of quality and reliability that you've come to expect, at prices that represent real value for money.

We know that customers demand appliances that make life easier and that put them firmly in control.

Now imagine all of this coupled with one of the best appliance warranties on the market. Add in cutting edge design and it's clear to see why more and more people are making themselves at home with NordMende.

PyroClean

During the pyrolytic cleaning process, the oven heats up to approximately 450°C for 1 hour, while the door is locked for safety purposes.

At this temperature, residues from roasting, grilling and baking are reduced to a thin layer of ash that can simply be wiped away with a damp cloth.

Easy to Clean (ETC) Enamel

Easy To Clean Enamel is standard for all platforms.

The special formula of Easy To Clean enamel (ETC) prevents dirt sticking to the inner walls thus cleaning is easier.

Catalytic Enamel

Catalytic enamel self-cleans by absorbing fats and oil and burning them to ash, which can then be easily removed from the floor of the oven with a damp cloth.

Oven Functions Explained

Oven Lamp

Allows for the oven cavity to be lit without any heat. Ideal for helping during cleaning to make sure the cavity is as clean and pristine as possible.

Top Heat

An element in the top of the oven, this function is perfect for browning food

Fan Oven

An element in the back of the oven works together with the fan, distributing heat evenly and allowing for perfect cooking on more than one level.

Double Grill

For occasions when you need to grill more food, this function activates the full grill element surface for perfect results with larger quantities.

Pizza Oven

No matter what style pizza you like, this function uses the bottom element together with the fan and element to deliver perfect pizzas everytime.

De-Frost

Activates the fan only, speeding up the defrosting process while retaining moisture and colour.

Conventional Oven

Using the top and bottom elements, this is perfect for traditional style cooking. Perfect for baking and pastries.

Grill

A grill element in the top of the oven lets you grill small amounts of food perfectly every time.

Double Grill + Fan

The double grill with the fan allows for the best results when finishing larger roasts or grilling meats.

Bottom Element Heat

Using an element in the base of the oven, this function is perfect for slow cooking and keeping food warm.

Bottom Element + Fan

Perfect for baking bread or open top tarts, pies, pastries, etc, this function uses the bottom element and the fan to give the best baking results possible.

Conventional Oven + Fan

The conventional oven and the fan work together, allowing for traditional style cooking with even heat distribution from the fan.

Grill + Fan

The grill plus the fan work together to evenly distribute heat. Perfect for browning and finishing small roasts.

3D Heat

Using all elements with the fan, this is the perfect setting for multilevel cooking or baking.

- 24cm Turntable
- 8 Auto Programmes
- Defrost by Weight or Time
- Child Lock
- Digital Clock
- Black
- 1 Year Warranty

NM824BBL

Hob Functions Explained

Auto Off

The hob will automatically shut off if left idle for a period of time (1.5 to 6 hours depending on the power level).

Boost Function

Increases the power to an individual zone to provide rapid heating to that zone. Great for bringing a pot of water to a rapid boil.

Bridge Zone

This function locks 2 zones together to act as a single zone. Fantastic when you want to use large pots pans or heat a roasting tray.

Child Lock

Locks the hob controls to ensure the hob cannot be activated by small & curious hands.

Timer

Allows you to set a timer for individual or combined zones to ensure perfect cooking times when needed.

Touch Surface

Easy to use touch controls offer more flexibility and a cleaner look than traditional knob controls.

Hot Surface Indicator

For added safety, an indicator will display for each zone after cooking highlighting when the zone is still hot.

Safety Function

For induction hobs, a thermal cut off system activates if the hob detects it is overheating. In gas hobs, a flame failure device will shut off the gas if the flame goes out.

Slider Touch

Slider controls offer even greater flexibility and allows power levels to be set easier than standard touch controls.

Pause Function

This function will pause all the cooking in all zones and restart it from the same power levels when pressed again. Paused zones will remain warm.

Plug & Play

For easier installation, you can set the maximum power of the hob if needed, allowing a standard plug to be used if required.

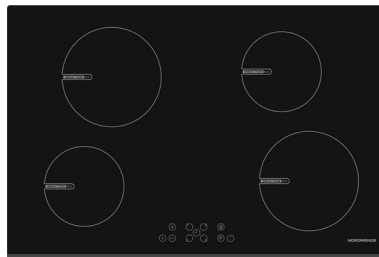

Pot Detection

The hob will wait until it detects the correct type or size of pot or pan before activating a zone. Otherwise, the hob will switch off automatically after 2 minutes.

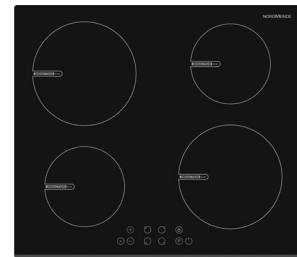

- 90cm Induction Hob
- 5 Zones & 2 Bridge Zones
- Slider Control
- Residual Heat Indicators
- Automatic Pot Detection
- Frameless Design
- Boost Function on all Zones
- Electronic Timer
- Child Lock

Energy Labels Explained

You may have noticed that energy labels for some home appliances have recently changed to a new look & design. This is due to the technological advancements manufacturers, such as NordMende, have made in home appliances over the past number of years. New, innovative ways to reduce the energy consumption of appliances have been developed, making them easier to use and more environmentally friendly. However, advancements have been so great that many appliances now fall outside the old energy rating scale with many appliances going above the A+++ limit.

In order to assist with consumer decision making, a new label and new measuring methods have been developed. The old D to A+++ rating scale has been redesigned to a new G to A scale, effectively “moving the goal posts” to allow for an easier to read label.

It's important to note that new appliances have not become less efficient, in fact most new appliances are even more efficient than before, but the rating and measuring methods have changed to become more relevant, easier to compare and to assist in deciding which appliances best suit your needs.

As of 1st March 2021 all dishwashers, washing machines, washer dryers & cooling appliances now carry this new label, with tumble dryers and cooking appliances following in 2022.

- 186cm Larder Fridge

- 3 Year Warranty

RIUF102NM

Washing Machine Features & Programmes Explained

Unbalance Control System

In the case of unevenly distributed laundry, this system redistributes the load inside the drum and adjusts the spin speed to achieve the optimum spinning efficiency.

Boomerang Cabinet

These side panels are designed to strengthen and increase rigidity and stability, and to decrease the vibration level.

Overflow & Foam Protection

This system detects potential problems with the water supply, which may result in overflowing. If a problem is detected, the drain pump is automatically turned on.

Stainless Steel Pearl Drum

The new pearl drum pattern provides greater protection to gently wash clothes.

Eco-Logic System (Half-Load)

When the washing machine is half-loaded it will detect this & automatically decrease the energy consumption by up to 50%, and dramatically decrease the programme durations.

Spin Reduction & No Spin

Optional spinning speed reduction by 400RPM and no spin option. A lower spin speed reduces creases and is used for delicate clothes.

Delay Timer

This enables the user to postpone the starting time of the washing process from 1-23 hours.

Child Lock

Child lock prevents any unauthorised changes on the control panel settings while the washing machine is in operation.

Adjustable Temperature

Adjust the temperature from 20°C - 90°C to adapt to the needs of the fabric and how soiled the fabric is.

Allergy Safe

NordMende Washing Machines are effective for allergenes and bacteria types when the "Allergy Safe" programme is selected

Allergenes

Pollen
Cat
Dog

Bacterias

Dust
House dust mite
Living house dust mite

Fungus

Escherichia coli
Enterococcus faecilis
Staphylococcus aureus

Fungus

Cladosporium
Cladosporioides

Eco 40-60

This is used to clean normally soiled cotton laundry declared to be washable at 40°C - 60°C. This programme reflects the efficiency stated on the energy label.

Hand Wash/Delicate

This programme is designed specifically for items of clothing that are recommended to be hand washed or for delicate laundry, washing at a temperature of 30°C.

Fast 60' 60°C

A superb washing performance is possible for your cotton clothes in a very short time, only 60 minutes! Washing at 30°/ 40°/ 50°/ 60°C.

Rapid 15 min

The shortest programme ever! It is ideal for clothes "worn once", which you need in a hurry, just 15 minutes. Washing at 30°C.

Spin/Drain

Additional spin step to any type of laundry after the washing cycle

Jeans

This programme is designed to wash black and dark items made of cotton, mixed fibre or jeans at a temperature of 30°C.

Cotton

This programme is used for very dirty cotton and flax fabric at the following optional temperatures 40°/ 60°/ 70°/ 80°/ 90°C

Cotton Prewash

Recommended as an additional washing process for heavily soiled laundry, at 30°/ 40°/ 50°/ 60°C

Wool

This programme is designed for woolen laundries with machine wash labels, washing them at 30°C.

Duvet

This programme is for washing a fibre duvet with a machine washable label (max. 2.5 kg) at a temperature of 40°/ 30°C.

Mix

This programme allows you to wash cotton, synthetics, colours and flax fabric together at a temperature of 30°/ 40°C.

Rinse

Additional rinse can be added to any type of laundry after the washing cycle.

Cotton 20°C

This programme is ideal for washing slightly dirty clothes with 20°C water.

Colours

This programme is designed for coloured fabrics or lightly soiled cotton and linen fabrics, it washes at 40°/ 30°C.

Outdoor / Sportswear

This programme is for very dirty or synthetic-mixed fabrics, washed at 40°/ 30°C.

DF452

Overflow & Leakage Protection
Protects against overflow and deactivates the dishwasher if a leak is detected beneath the machine.

Delay Timer
The start time of a program can be delayed, from 1 to 24 hours.

Quick Clean
A quick clean programme, varying in time, depending on the model, from 15 mins to 50 mins.

Child Lock
The buttons on the control panel can be locked, to prevent curious hands from activating the dishwasher.

Hygiene Wash
A dedicated programme which increases water temperature at final rinse to help eliminate bacteria.

Turbo Drying
A fast drying function to aid dish drying at the end of the wash cycle.

Half Load
Reduce energy and water usage by activating either the top or bottom basket for half loads.

3rd Shelf
A 3rd shelf at the top of the dishwasher for cutlery allows for added space on the bottom shelf.

Customer Service

That puts you first every time.

All NordMende appliances are built to last, harnessing the very best of technology. And with a 3 Year Parts & Labour warranty on nearly all the appliances featured in this brochure* you can look forward to a trouble-free life with NordMende.

At NordMende, the quality of our after-sales service is just as important to us as the quality of our products. Naturally, if you choose an appliance supplied by us you will be able to rely upon your appliance to provide you with many years of loyal service and devotion to duty. However, in the event of a problem, you can feel secure in the knowledge that our experienced repair team are dedicated to ensuring an outstanding after sales service for you.

Our after-sales service team are committed to developing an outstanding customer journey experience for you and whatever your preference, we will keep you updated via telephone calls, email or text regarding your products' repair journey.

For ROI customers, we are based right here in the Republic of Ireland with a network of engineers nationwide at your convenience.

For NI & GB customers, we have local networks of engineers available at your convenience

*Register To Receive Your Free 3 Year Warranty

All NordMende household appliances are fully guaranteed for 2 years from the date of purchase. If you register online or with our customer service team within 30 days of purchase you will receive an additional 1 year free - so 3 years in total.

Your warranty covers major parts only and excludes microwaves which carry a 1 year parts and labour warranty.

Please retain your original proof of purchase to secure your warranty guarantee.

How To Register?

For ROI please register online at www.nordmende.ie/warranty-registration

For NI & GB please register at www.nordmende.co/warranty-registration

Before registering, please have the following information:

1. Serial number
2. Date of purchase
3. Place of purchase
4. Your full name, address and contact telephone number

Aftersales Service

For ROI please contact us online at www.nordmende.ie/contact or call our advisors on **01 4136400**.

For NI & UK please contact us online at www.nordmende.co/contact or call our advisors on **028 9023 5088** (NI) or **0845 600 3310** (GB)

Before contacting us please have the following information:

1. Serial number
2. The phone number the product was registered against
3. Fault details

NordMende Warranty Conditions:

- The Guarantee covers the appliance for use in a normal domestic environment. Institutional or commercial use is not covered.
- The appliance has been correctly installed and used only on the electricity or gas supply stated on the appliance rating plate.
- All Gas appliances must by law be fitted by a Registered Gas Installer
- The appliance has been used in accordance with the manufacturers operating and maintenance guidelines.
- The appliance has not been serviced or tampered with by an unauthorised service engineer.
- Registration can only be confirmed by entering the products valid serial number.- see our website for instructions on where on your appliance you can locate the serial number.

Your NordMende Warranty Does Not Cover:

- Damage or as a result of transportation, improper use or neglect.
- Complaints due to the use of incorrect voltage.
- Failure of the water supply.
- Failure of the electricity supply.
- Failure to operate the appliance in line with the guidelines set out in the instruction manual.
- Replacement of consumable items. E.g. Fuses, bulbs, broken glass, knobs
- Replacement of any cosmetic parts including ceramic hob glass and all appliance doors.
- Replacement of any accessories such as oven trays.
- Any service calls as a result of lack of maintenance of the appliance, e.g. filter blockages, drainage systems, soap dispensers etc.
- Appliances found to be used in a commercial environment

NORDMENDE

SMART LIVING

The Home of NordMende

Come visit the KAL showrooms, based in Citywest Business Campus. This state-of-the-art showroom (recently renovated) is Ireland's largest showroom for quality home appliances and the home of NordMende in Ireland. Showcasing the full range of NordMende appliances, along with many other quality home appliance brands.

KAL is Ireland's leading distributor of globally recognised kitchen and domestic appliance brands. They are the exclusive Irish distributor of NordMende, De Dietrich, Elica, Franke, Shark and Ninja amongst others.

Book an appointment, either online or in person, with one of KAL's highly trained advisors and you will receive a bespoke, one-on-one service to help you find the right appliances for your kitchen.

Visit **www.kal.ie/one-to-one** to book your appointment.
