NEW SINGLE FLUTE DESIGN
 Unique single flute has 28% greater capacity meaning more efficient waste removal for higher speed performance

SURFACE
 Two-tone dark gold and silver finish for easier identification

SPEED
 Unique tip and flute design means 60% faster drilling than competing drill bits

UNIQUE POINT GRINDING

- Unique diamond ground 4-face carbide tip design
- Extreme low drilling pressure means faster drilling and up to 100% more holes per battery charge compared to competing drill bits
- Excellent centering - will not walk
- Perfect hole quality
- Long life

HIGHLY VISIBLE ANTI-SLIP TAPE that solves slip issues and helps to warn of an impending hazard.

FEATURES

- Anti-Slip
- Easy to Apply
- Great for Stair Nosings
- Black & Yellow Striped Tape
- For Internal & External Use
- Self-Adhesive
- Durable
- Long Length Roll for Various Uses

TAPES

ALUMINIUM FOIL TAPE is a 30u nominal dead soft aluminium foil with aggressive flame-retardant acrylic adhesive and protected by easy release liner.

FEATURES

Excellent Peel Adhesion Good Initial Tack & Permanent Bonding UL723 Fire Rating Approval, Outstanding Temperature & Aging Resistance

APPLICATIONS

Super performance, UL 723 FR grade 30u foil tape. Ideal for sealing joints/seams against moisture and vapour on foil jacketing insulation. Suitable for many other permanent sealing, holding, splicing or masking applications requiring the protection offered by a foil backing.

SAFELINE FIRE RATED ALUMINIUM FOIL TAPE

AT06A	50mm X 50MTR	36	

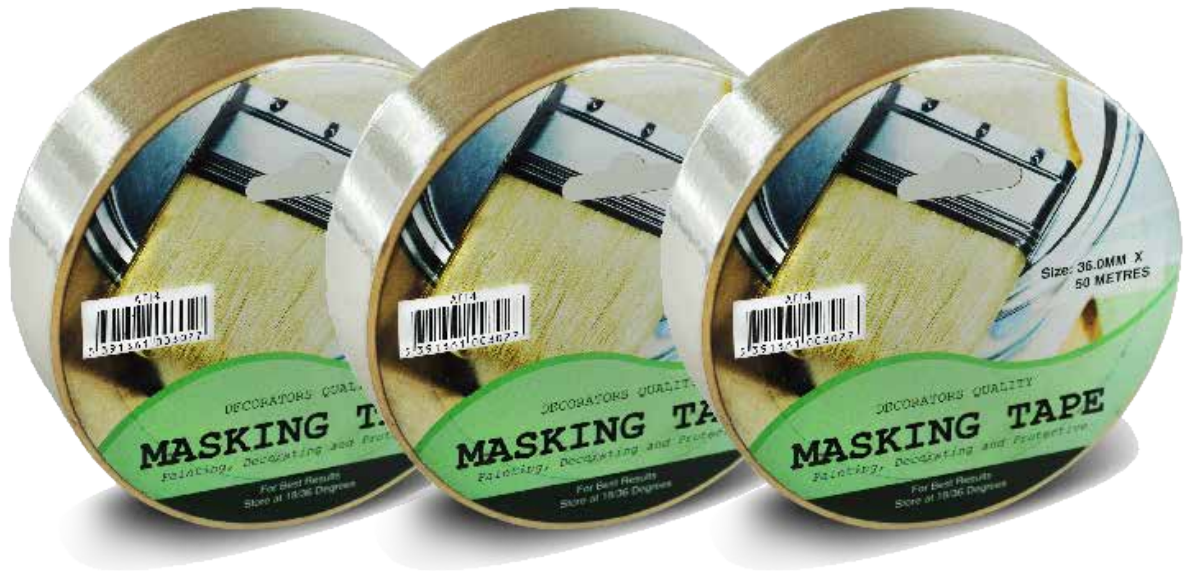

SELF ADHESIVE SCRIM TAPE is used to tape over joints before skimming plasterboard. It's flexible to prevent bubbling which gives it a cleaner finish. Our hand jointing tape adds more lateral strength than scrim and mesh tape so it's much less prone to crack. If its sculptures and moulds you're working on then brown jute is what you are looking for to help reinforce your project. Finally our acoustic impact strip is designed to create good impact on sound insulation as it absorbs floor unevenness

TAPES

TAPES

DETECTAMESH™ DETECTABLE TAPE is a plastic mesh with a traceable stainless steel wire laminated between the mesh and a polyethylene tape which is printed with a warning message to warn future excavators of the location and potential danger of the utility services / pipes and cables below (Water Main, Gas Pipe, Electric Cable etc). The stainless steel wire acts as the detectable element that can be located by a CAT & GENNY (cable avoidance tool / cable and pipe locator) by direct connection or induction where applicable. Plastic mesh is manufactured to BS EN 12613:2001

Detectamesh™ detectable tape is suitable for:

- marking energised and unenergised electric power cables
- marking fibre optic cables
- marking plastic gas and water pipes
- for locating services by using a cat and genny cable avoidance tool

CLIMAX PRO GOGGLE

The AZAHARA GOGGLES has been designed to protect against mechanical risks, chemicals, dust and drops or mists of liquid. It offers a wide field of view thanks to its wrap-around design. The frame is made of vinyl material and its design allows it to be used with most of the user's own prescription glasses. The polycarbonate eyepiece offers excellent protection against mechanical risks. The polycarbonate eyepiece offers excellent protection against mechanical hazards. The support band is adjustable to suit the different morphology of users. Weight: 0.107 kg.

CODE: CLX2001

CLIMAX GOGGLE INDIRECT

Designed to offer effective protection against the impact of high speed and low energy particles, against liquid drops or splashes, coarse dust particles, gas and fine dust particles. Optical class 1. Treatment: Anti-fog + anti-scratch. Ventilated*

CODE: CLX2002

CLIMAX RUBBER MASK INCL P3 FILTER

Main body of the half mask: The main body of the half mask is made from thermoplastic rubber. The design and the material used allow it to adjust to the face in an airtight manner, preventing air from leaking into the interior through the face/mask join. The main body houses the filter connector and two exhaling valves. Exhaling valves: The half mask is fitted with two exhaling valves made up of a valve-holder and a membrane, which makes it easier for exhaled air to escape. Fastening harness: It has a comfortable neck strap and head strap that can be easily adjusted to the right length. Filters The filters are secured to the half mask with a thread system Weight: 0,170 Kg.

CODE: CLX2004

CLIMAX 2.5M FALL BLOCK ARRESTER

It is a device with an automatic inertia braking system in case of a fall. These devices, once secured to a safe anchoring point, enable the user to work with the maximum mobility, safety and comfort on slopes, roofs, coned spaces. The retractable lifeline device model Climax 2.5 M consists of:

- 2 x Hook Climax 30: Symmetrical connector with a manual threaded locking. 16mm opening. Used for anchoring or to connection structures.
- Cover made in ABS.
- Fitted with energy absorber. It is stopped with a force of less than 6kN.
- 49 mm wide lanyard. Length: 2.5m.
- Working load: 100 kg.
- Weight: 1.075 kg

CODE: CLX2013

CLIMAX FACE SHIELD

Browguard The semi-circular browguard is manufactured of black polyethylene and includes a narrow brim. The visor is attached to the browguard by means of two centre pins and two turn fasteners on the sides. The browguard also contains a slot on each side in order to hold a bolt-nut system used to attach the browguard and headgear. Headgear The headgear system is composed of a harness and adjustment system, manufactured of injection-moulded black polyamide. The harness comprises two parts, an upper cross strap and a contour strap. The length of the cross strap can be adjusted by means of the holes and anchor stud system. The contour strap has a middle section (which rests on the wearer's forehead) and side arms that join at the rear of the head by means of the adjustment system. This system, which has a closing tube, guide and wing nut, allows easy adjustment of the contour band circumference by simply pressing and simultaneously turning the wing nut. For greater comfort, the contour strap has two self-sticking foams on the front of the strap where it rests on the wearer's forehead. Visor The visor is manufactured of 1.15-mm thick clear polycarbonate. Optical class: 2 Visor size: 190 x 324 mm Harness size: 56 - 64 cm Weight: 0,262 kg

CODE: CLX2003

CLIMAX P3 FILTER SINGLE

Filter P3 against particles made up of a high-density polyethylene black base fitted with a round cover made up with the same material. Between the cover and the base there is a pre filter with a high absorption capacity against particles. Thread connection system. Grinding, cutting, drilling of wood, stainless steel, paint, lacquer and corrosion, resistant paint. Varnishing with solvent-based paint, asbestos removal. Protection against bacteria and viruses. R mark: Reusable filter

CODE: CLX2005

CLIMAX HARNESS BASIC

Includes a dorsal fall arrest attachment point (A) comprising with a 8mm steel D buckle (No.1) and a chest fall arrest attachment point composed of two straps. (No.2) 45 mm polyester strap. Includes buckles on the leg loops. The lifetime estimated of this product is 10 years and 5 years after the first use, Fall arrest (EN 361:2002 CE)

CODE: CLX2006

CLIMAX 4 POINTS HARNESS MAXIPRO

The harness includes two anti fall anchoring points: dorsal (A) with a 8mm D buckle (No.1) and chest fall arrest attachment point (No.2) composed of two straps (A/2). The work positioning belt (No.3) allows the user to safely and securely anchor himself to the structure on which he is working to achieve full fall protection. The belt is made of polyester strap with a width of 45 mm. The waist belt contains the D-rings used to secure the user to the anchoring point. Weight: 1,47kg. Maximum weight: 100kg.

CODE: CLX2007

1. CLIMAX FALL ABSORBER 1.6

This energy absorber is made up of an absorption strap and a fastening strap. The absorption strap is a white strap made up of two pieces of interwoven fabric, which are folded and are contained in a transparent plastic cover. The ring and fastening strap is an orange polyester strip with sewn loops at the ends. The loops are protected by a plastic transparent cover. Protection against static electricity. To use in a potentially explosive atmospheres (ATEX). The lifetime estimated of this product is 10 years and 5 years after the first use. Total length: 1'6m. The energy absorber mod. 31-A is also available with 2 connectors mod. Climax 30 (energy absorber mod. 31-A 30/30).

CODE: CLX2008

2. CLIMAX FALL ABSORBER LANYARD 35CM

This energy absorber is made up of an absorption strap and a ring and fastening strap. The absorption strap is a white strap made up of two pieces of interwoven fabric, which are folded and are contained in a transparent plastic cover. The ring and fastening strap is an orange polyester strip with sewn loops at the ends. The loops are protected by a plastic transparent cover. Protection against static electricity. To use in a potentially explosive atmospheres (ATEX). The lifetime estimated of this product is 10 years and 5 years after the first use. Total length: 1'6m.

CODE: CLX2010

3. CLIMAX 2M WEBBING LANYARD

Have Comfortable Elastic Webbing Lanyard that comes with automatic hooks or with snap and scaffold hook. Includes: Securing strap: made of woven synthetic fibre of 40mm nominal width. With a tubular construction and incorporating an elastic inside to avoid undesired stretching of the strap. Energy absorber: Energy absorption strap. 1 connector mod. 32: Steel directional connector. Automatic threaded locking system. Used for anchoring or to connect in structures. MBL: 22 kN. 18mm opening. 1 connector mod. 31: Directional steel connector with an automatic jocking system. Appropriate for connection to large diameter structures. MBL: 22kN. 54 mm opening. The lifetime estimated of this product is 10 years and 5 years after the first use. Total length: 1'50m. Weight: 1,110 kg

CODE: CLX2009

CLIMAX HOOK CONNECTOR OPEN 54CM

The connector Climax 31 is a component of a safe fall protection or restraining system. The connector is designed to connect the various components of a fall protection or restraining system and to connect the entire system to the anchorage point on the structure where the user is working. The connector mod. 31 is an essential part of a failsafe fall prevention or fastening system. The snap ring is designed to be used as a connection between the fall prevention system and the anchoring point on the work structure. All connector components are made of steel with

AQUA GRIP WATERPROOF

Aqua Grip is a double latex fully coated glove, constructed on a 13-gauge nylon liner. Aqua grip is 100% waterproof keeping the user's hands dry and comfortable. It is our preference in terms of grip and flexibility in wet environments. It guarantees comfort and grip while maintaining an excellent level of flexibility.

KEY FEATURES

Ultra-flexible latex coating with superior grip on the palm for improved comfort and protection in wet conditions.

Water-repellent coating with a natural fit, for continuous comfort over long periods of use
Great grip performance for safe and precise handling in wet environments

Cushioned on the palm, offering the wearer improved comfort and protection

FILTERSPEC® PRO™

The unique patented FilterSpec® Pro™ effortlessly combines both eye & respiratory protection. The 5.5 base one piece polycarbonate lens offers optimal coverage and class 1 optics whilst ergonomically shaped soft goggle housing provides excellent levels of comfort and unbeatable levels of protection. Anti-Scratch coating as standard. FMP3V filtration giving 94% efficiency. FilterSpec® out exceeds EN1827 for breathing resistance by more than HALF and performs over 3% above the standard for filtration efficiency. Includes white holder, 3 filters and spectacle with Clear HC & Anti-Mist Lens.

FEATURES

GOGGLE

- Stylish goggle design providing impact protection.
- Fully adjustable dual wide fitting elastic harness for optimum fit & comfort.
- 5.5 base, one-piece lens offers optimal coverage.
- Anti-Mist Coating on Lens as standard.
- Anti-Scratch Coating on Lens as standard.
- Conforms to EN166 T.B.T 3.4.N

FILTER MASK

- Disposable filter mask element for optimum protection.
- Re-usable filter holder element for an economic PPE solution.
- Conforms to EN1827:1999+A1:2009
- Lightweight for user comfort. (Under 60g)
- Exhale valve fitted for increased filter element longevity.
- Each product comes supplied with 3 filter elements.
- Removable, replaceable elastic strapping.

ECABSORBER LANYARD 2.0M DA-1

CODE: 031130

SHOCK ABSORBING LANYARDS

The shock absorbing lanyards approved by norm EN 355, will be used as elements or components, well integrated with a fall arrest lanyard, an anchor point or a fall arrest harness, or perhaps in combination with some of them.

A shock absorber is a component or an element of a fall arrest system designed to clear the kinetic energy developed during a fall from a determined height.

CHARACTERISTICS

The shock absorber ECOABSORBER is produced with high tenacity polyester yarn. Special made webbing (patented) that with its loss of shape or destruction, absorbs an important part of the developed energy during the fall.

ECABSORBER DA-1S LANYARD

CODE@ 031144

SHOCK ABSORBING LANYARDS

The shock absorbing lanyards approved by norm EN 355, will be used as elements or components, well integrated with a fall arrest lanyard, an anchor point or a fall arrest harness, or perhaps in combination with some of them.

A shock absorber is a component or an element of a fall arrest system designed to clear the kinetic energy developed during a fall from a determined height.

CHARACTERISTICS

The shock absorber ECOABSORBER is produced with high tenacity polyester yarn. Special made webbing (patented) that with its loss of shape or destruction, absorbs an important part of the developed energy during the fall.

SCAFFOLDING HOOK

CODE: 031177

This is an auto-locking directional connector with very large gate opening for connection to metal structures or to large-diameter cables and bars.

It has a gated connection point for attachment to different types of lanyards.

If the lanyard is damaged, the connector can thus be reused.

The double action opening is ideal for one-handed operation. Training is essential before use, to ensure safe use of this product.

ZG-90® COL D ZINC GALVANISING SPRAY

ZG90 is the ideal repair coating for newly galvanised metals. Formulated to look like newly galvanised metal when dry, ZG90 can be used as an undercoat or top coat. The product is fast drying to reduce downtime and delay. ZG90 is suitable as a base for most common finishes. If in doubt try on a small area first to test. (Do not use on the inside of water storage tanks).

PRO SOLVE SILVER ZINC GALVANISING SPRAY 500ml

Prosolve is recognised as a market leading brand for Maintenance, Marking, Workshop, Coatings and Hand Care. The silver zinc galvanising spray is suitable for use in the production, maintenance and construction industries. This product can be used as a coating on pipes and steel fabrications to reduce corrosion and as an exceptionally good primer coat.

Code: **AC1785E**

500ML SPRAY

DESCRIPTION AND RECOMMENDATIONS

Improved multifunctional EP Grease by plastic deformation of its micro additives and formulated for lubrication under harsh mechanical conditions and long frequency rhythms in lubrication.

APPLICATIONS

For all types of bearings working with heavy loads, vibration or in the presence of moisture.

In flat bearings, including yellow alloy, working with heavy loads or partial rotation abrasion

To protect the vibro-corrosion development or accelerated wear of bearings and cardan transmission grooves and grooved boards with high torque.

Lubrication of rolling mills or calenders by sliding pads.

AEROSOL

AEROSOL

AC-90® LIQUID MAINTENANCE

AC90 DISPLACES MOISTURE - Corrects faults on damp vehicle ignition systems, simply spray over exterior of all distributor leads, spark plug leads and coil leads. Regularly apply AC90 to keep your engine running smoothly.

Suitable for electronic ignition systems

AC90 LUBRICATES - Cleanly restores smooth silent operation to doorhinges, locks, castors, drawer runners and curtain rails. Stops sticking, stops squeaks. AC90 PENETRATES - Rapidly loosens rusted, corroded parts, seized nuts, bolts, cables and metal parts. De-scales taps and showers.

AC90 CLEANS & PROTECTS - Removes dirt, grime, lime scale, crayon marks, chewing gum and adhesive. Leaves a clean protective film to protect against rust.

Removes bloom from fridges, cookers and stainless steel sinks.

If in doubt about suitability try on a small area first.

Protects all metals from corrosion and is ideal for use on items in storage.

DOES NOT CONTAIN SILICONE

Code: **AC1530**

250ML

Code: **AC1842**

415ML

Code: **AC1839**

500ML

CT-90® FOAMCUT

CT90 CUTTING & TAPPING FLUID - is a special fluid which will not break down under extreme pressures. A coating of CT90 will allow swarf and cut chips of metal to be removed by the cutting tool with less friction. Less effort is therefore required to cut even the hardest metal. Cut surface finish is improved and cutting times are reduced.

CT90 has been formulated to be suitable for all types of steel and ceramics, even high tensile steels. Due to the active nature of the product there is a risk of staining if the product is used on some yellow metals.

CS90 DRILLING - Apply CS90 during the drilling operation.

CS90 will increase drilling efficiency and prolong drill bit life.

CT90 THREAD CUTTING - Apply CT90 to the die or tap prior to use and also during the operation. CT90 is suitable for both machine and hand operations and is particularly recommended for pipe work where the risk of thread wall deformation during cutting is reduced.

CT90 HACKSAWING - Apply to the hacksaw blade before and during the sawing operation.

CT90 is suitable for use with power saws and hand saws.

Code: **AC1846**

500ML SPRAY

AEROSOL

AEROSOL

CS-90® ANTI SEIZE GREASE

CS90 - Is a very high copper content anti-seize grease with added graphite, which prevents corrosion, fretting or galling. Use CS90 on screws threads or where metal surfaces mate. CS90 remains effective over long periods of time. Nuts, Studs, and Bolts can be easily removed when treated at time of assembly.

CS90 can be removed with white spirit or normal de-greasing methods. Graphite content allows easy dismantling. The extra fine copper particles in CS90 act as a barrier to corrosion even in harsh conditions.

SL 90 VISCOUS LUBRICATING OIL

SL 90 VISCOUS LUBRICATING OIL uses a high quality mineral lubricating oil formulated to have a wide operating range, Clean for house hold use yet strong enough for industrial purposes.

SL 90 VISCOUS LUBRICATING OIL contains a special blend of anti rust agent which will protect all surfaces against corrosion and is formulated to grip metal parts.

SL 90 VISCOUS LUBRICATING OIL has P.T.F.E (POLYTetraFLUOROETHYLENE) added to reinforce the oil film layer and provide lubrication for metal to metal parts for longer periods of time than can be achieved with oil film coating., P.T.F.E has the lowest coefficient of friction (0.1) of any of the solid additive products. P.T.F.E is solid at normal temperatures and is stable up to 260 degrees centigrade, P.T.F.E is non toxic and chemically inert.

SEAL-UP

is the worlds first permanent Cooling System repair product.

If you have a blown head gasket, cracked engine block or leaking radiator, Seal-Up will stop the leak permanently, without the need for any expensive and time consuming labour and spare parts.

SEAL-UP will repair liquid based cooling systems in :

- Motor Cars
- Lorries
- Agricultural Vehicles
- Building Site Plant
- Classic Cars

SEAL-UP fixes leaks in:

- Radiators
- Engine Blocks
- Cylinder Heads
- Water Pumps

THERMOSTEEL

is a unique steel ceramic paste for repairing cracks and holes in metal objects which are exposed to extreme heat and/or open flame. Heat resistant to 1300°C.

With Thermosteel you can do the job of a hot weld repair virtually anywhere and anytime. In addition to this, you will save time and money by avoiding traditional repair bills or worse still, the trouble and cost of arranging a replacement part.

THERMOSTEEL is ideal for use:

- At Work
- At Home
- On Motor Vehicles
- On Boats & Ships
- On the farm
- Withstands up to 1300C

THERMOSTEEL repairs cracks and holes in:

- Exhaust Manifolds
- Silencers
- Catalytic converters
- Flues
- Central heating boilers

QUICKSTEEL

Can be used to repair leaks, breaks, cracks and holes in:

- Cars; Bikes; Lorries; Caravans; Boats; Mowers;
- Engines; Batteries; Exhausts; Fuel Tanks;
- Machinery; Cookers; Radiators; Pipes; Ponds;
- Tanks; Baths; Sinks; Tiles; Furniture; Tools...

In fact, the list is almost endless.

QUICKSTEEL is easy, safe and simple to use :

- Clean and prepare repair object by sanding the application area.
- Cut off the required amount of Quik Steel.
- Knead the putty thoroughly until it is an even colour and streak free.
- Apply firmly to the repair object
- Wash hands with soap & water
- QuikSteel can be drilled, sawn, milled, ground, filed, tapped, sanded, painted and lacquered once it has cured.

FAST STEEL EPOXY PUTTY

is an easy to mix, steel reinforced epoxy putty, which dries 'steel' hard in just 10 minutes. It can be used to 'weld' two steel pipes together, stop leaks in radiators or exhaust pipes, or fill around a tap and can be drilled, tapped, filed, machined, sanded and painted.

ABSORBENT BAG

ABX 10 is a fire retardant, highly absorbent wood fibre which absorbs oil, grease and other liquid spillages. It is lightweight, non-toxic and can be incinerated, saving on costly landfill charges; it is cost-effective when compared to other granule adsorbents.

HAND HELD FOAM 750ML TIN

Code: **HHF**

Fix & Fill Expanding Foam is a quick setting polyurethane based foam which expands greatly on application and yields up to 50 times original can contents. Can be cut, sawn, plastered and sealed over after approximately one hour. Fills irregular gaps, fixes framework, insulates and sound deadens.

HAND HELD FIRE RATED FOAM 750ML TIN

Code: **HHFFR**

Firefoam B2 Handheld is a quick setting fire rated, one part polyurethane foam in a ready to use hand held canister. Fire resistant for up to 2 hours in certain joint configurations. It expands on application to up to 50 times the can contents and meets the requirements of the test criteria for BS 476 Part 20 plastered and sealed over after approximately one hour. Fills irregular gaps, fixes framework, insulates and sound deadens.

GUN GRADE FOAM 750ML TIN

Code: **GGF**

Gun Grade Expanding Foam is a quick setting polyurethane based foam which expands greatly on application and yields up to 50 times original can contents. Can be cut, sawn, plastered and sealed over after approximately one hour. Fills irregular gaps, fixes framework, insulates and sound deadens. Designed for professional use in conjunction with Gun Foam Applicators. BOX 12

GUN GRADE FIRE RATED FOAM 750ML TIN

Code: **GGFR**

Firefoam B2 Gungrade is a quick setting fire rated, one part polyurethane foam designed for application by any standard foam applicator gun. Fire resistant for up to 2 hours in certain joint configurations. It expands on application to up to 50 times the can contents and meets the requirements of the test criteria for BS476 Part 20. FOR PROFESSIONAL USE ONLY plastered and sealed over after approximately one hour. Fills irregular gaps, fixes framework, insulates and sound deadens.

DUAL PURPOSE FOAM CLEANER 500 ML TIN

Code: **EBDUEFC**

Dual Purpose Foam Cleaner is used to remove wet/uncured foam. Attaches to Gun Foam Applicator for purging through; also includes spray nozzle for use without applicator to remove wet foam from outside of the gun and from most building substrates.

MULTI PURPOSE GREASE 400G

Code: **EP2**

A high quality multipurpose EP2 lithium grease suitable for most grease guns

A revolutionary filler formulated using lightweight polymer bubbles that fills most holes and cracks, even deep holes, in just one quick application with no need for secondary filling to level off as One Strike will not shrink, sag or crack. One Strike Filler finishes smooth, requiring little or no sanding and can be ready to paint in approximately 30 minutes.

APPLICATIONS: THIS IS SPECIALLY INTENDED TO PRODUCE SEALING AND BONDING JOINTS IN THE CONSTRUCTION AND GLAZING INDUSTRIES, NOTABLY FOR:

- TRADITIONAL CONSTRUCTION (EXPANSION AND STABILITY JOINTS)
- LIGHT PREFABRICATION (CURTAIN WALLS, METAL COVING)
- FLOORING JOINTS (CONCRETE SLABS, MOTORWAYS, RUNWAY'S)
- CARAVAN JOINTS
- BONDING OF DECORATIVE PANELS
- PERIMETER SEALS IN ALUMINIUM, WOODEN, PVC FRAMES, ETC.
- ELASTIC SEALS IN GLAZING APPLICATIONS, ON ALUMINIUM, WOODEN PVC FRAMES ETC.
- HEAVY PREFABRICATION (TERRACE, PARAPET WALL AND FAÇADE PANEL JOINTS)
- VENTILATION DUCTS, PIPING PASSAGES, GUTTERING AND DOWN PIPES.
- BONDING OF MATERIALS TO VIBRATIONS

**AREAS OF APPLICATION:**

EVT 007 HPHA is used for miscellaneous bonding and the sealing of seams and joints in the construction of buildings (including glass and mirror assemblies, the latter in accordance with DIN regulation 1238), vehicles, train wagons and ships, as well as in mechanical, electrical and ventilation engineering and air conditioning technology. It may also be used on floor joints. Depending on the stability of the surface, EVT HPHA 007 is suitable for interior and exterior use; it may be used on damp surfaces. HPHA 007 creates elastic bonding between concrete, stone and brickwork, metals, plastics, wood, ceramics and marble

Everbuild silicone 825 is a low modulus, neutral cure, alcoxy, odourless silicone sealant that adheres to a wide range of both porous and non porous surfaces without the need for priming. Conforms to the requirement of 11600 F+G.

SPECIFICATION COMPLIANCES

Conforms to ISO11600 F 25LM. (Report number RLR.10+11)

BENEFITS

- Excellent tooling and slow skinning properties for large scale construction and glazing applications.
- Excellent adhesion - adheres to most common surfaces including glass, metals, plastics and wood (painted or unpainted), uPVC and polycarbonate.
- Excellent external weathering properties (over many years exposure).
- High viscosity non slump formula.

Anti-Pick 109 is a high modulus, one part, chemically curing solvent free sealant combining the best qualities of silicone and polyurethane technologies. It is specifically designed for providing a finger pick resistant seal accommodating small movement for areas where a normal sealant is not hard enough.

BENEFITS:

Excellent impact and wear resistance. Resistant to picking by fingers. Excellent primerless adhesion to most surfaces, including metals, most plastics, glass, polyester. High UV and aggressive atmosphere resistance. Excellent resistance to Chemicals & petrol (10% dilute acids, alkalis, most solvent). Overpaintable with certain paints (compatibility test should be made). Can be applied on damp surfaces. Non hazardous to health. High mechanical properties. Passed for use on different home office, national offender management services and ministry of justice projects

RECOMMENDED FOR:

Secure environments i.e. prisons & hospitals where the sealant is hard to reach or the person is under supervision. Municipal and public areas. Perimeter sealing of doors, windows and sanitary ware. Joints in heavy cladding.

Circular closed cell polyethylene foam cord in 10mm, 15mm, 20mm & 30mm thickness.

QUANTITY: 1150 metre roll.

Non absorbent compressible grey closed cell polyethylene foam backup material.

FEATURES

- Quick and easy to apply.
- Reduces sealant usage.
- Improves sealant performance by obtaining the correct joint dimensions.
- Flexible - won't bubble or blister.

RECOMMENDED FOR:

- Reducing the depth of joints in construction and glazing use.
- Creating a backstop to allow proper sealant tooling in expansion joints.

DESCRIPTION

FIRE SEALANT 400 is a neutral cure, elastic silicone sealant which has a fire rating of up to 4 hours in certain joint configurations (when tested to BS EN 1366-4 2006).

BENIFITS

Fire rated to BS EN 1366-4 2006

Neutral cure – adheres to most building surfaces, porous and non porous

Permanently flexible (25% movement accommodation)

Excellent weathering characteristics – suitable for internal and external use.

Can be used in joints up to 50mm wide.

No priming required for most construction substrates

Non slump – easy to apply and tool off

Forms an acoustic seal

RECOMMENDED FOR

All building joints which require a fire rating.

Sealing joints, voids and irregular holes in fire walls, partitions and other structures; also for maintaining the integrity of pipes and cables that penetrate them. Ideal for use for fire rated expansion joints.

EBFIREMATE 1	GREY	310ML		25

FIRE SEALANT 300 is an intumescent and acoustic acrylic sealant that swells when exposed to temperatures in excess of 150°C to prevent the passage of fire and smoke and has a fire rating of up to 5 hours, Fire rated to BS 476 part 20/EN1366-4 (2006). Typically used for sealing joints, voids and irregular holes in fire walls, partitions and other structures; also for maintaining the integrity of pipes and cables that penetrate them. For internal perimeter pointing of fire rated door and window frames. Acoustic rated to BS EN ISO 140/3. Tested for air permeability to EN13141-1 Ventilation fo buildings. Performance testing of components/ products for residential ventilation.

DESCRIPTION

FOREVER SAFE SILICONE is guaranteed to kill most common germs on the surface of the sealant including E-Coli, MRSA, Salmonella, Listeria, Staphylococcus, to stop Black Mould and is safe for use in Food Preparation areas. The antibacterial technology used has EU Food Contact Approval.

SPECIFICATION COMPLIANCES

Forever Safe is independently tested and certified by an accredited microbiological laboratory to show no mould growth after more than 10 yrs simulated ageing. Copies of test data are available upon request. Forever Safe is formulated using a premium quality permanently flexible waterproof 100% Silicone Sealant. Forever Safe is also formulated using an FDA approved Silicone Sealant with FDA approved fungicide.

BENEFITS

- Kills MRSA, E-Coli, Listeria, salmonella and Staphylococcus.
- FDA approved for food contact. For sealing in commercial kitchens and bathroom areas, Medical
- 10 year mould guarantee.
- Excellent flexibility - +/- 25%.

RECOMMENDED FOR

Pharmaceutical clean rooms, Hospitals, operating theatres and clinics and refrigerated food storage areas. Also, ideal sealing domestic kitchen worktops and food areas and communal shower areas.
